

TRAVEL WITH ME

Website Requirements	Revenue Generation	Legal Requirements	Tech Requirements	Maintenance/Staffing Requirements
<div><p>Options: There must be multiple Transportation options to ensure that the use is widespread and effective for each individual</p><p>Wtpeyton</p></div>	<div><p>Suggestive Advertising: Companies can pay to be top suggested in the places to eat, places to stay, and things to do sections, this will add some generalized revenue which can be scaled based on the size of the website.</p><p>Wtpeyton</p></div>	<div><p>Contracting: For ticketing between different service providers and the website there must be legal contracts for payment and reliable ticketing, to ensure customers are not being scammed or taken advantage of.</p><p>Wtpeyton</p></div>	<div><p>Credit Card Security: The website would likely use a service api to ensure user information security like Square, Stripe, Or American Express Merchant</p><p>Wtpeyton</p></div>	<div><p>Offices: There msut be a location where staff members are able to come and work for the company</p><p>Wtpeyton</p></div>
<div><p>Locational: The Website must be able to understand the individuals location and suggest different methods of travel based on their destination</p><p>Wtpeyton</p></div>	<div><p>Subcontracting: Prices must be regulated to still be fair to students and keep them buying but increased for the website to make money</p><p>Wtpeyton</p></div>	<div><p>Advertising: There will need to be a consideration into legal contracting for suggestive advertising and google ads to ensure compensation for the website.</p><p>Wtpeyton</p></div>	<div><p>Tech Stack: HTML, CSS, JAVASCRIPT, MongoDB/SQL, Koltin/Swift For IOS APP</p><p>Wtpeyton</p></div>	<div><p>Maintenance: There must be a designated team to ensure the website is consistently working and operational</p><p>Wtpeyton</p></div>
<div><p>Ease Of Use: The intention of the project is to ensure that students are able to more effectively access transportation so the website must be easy to use in order to ensure that we are solving the problem instead of complicating it.</p><p>Wtpeyton</p></div>	<div><p>Ticketing: By slightly increasing ticket prices the website will be able to keep tickets affordable while maintaining profitability.</p><p>Wtpeyton</p></div>	<div><p>Ticket Verification: Must have customers agree to ticket use and ensure that the companies the website is getting tickets from is not selling many versions of the same ticket.</p><p>Wtpeyton</p></div>	<div><p>Server Hosting: The Website will need to be hosted 24/7 so there will likely need to be a company server center, or we would need to outsource that to a service provider.</p><p>Wtpeyton</p></div>	<div><p>Developmental: There must be a engineering team to work on new features and updates to the website and company.</p><p>Wtpeyton</p></div>
<div><p>Price Estimation: The website must be able to connect Students to options that vary in price in order to reach the most amount of individuals at once.</p><p>Wtpeyton</p></div>	<div><p>Advertising: General google ads on the website will supply a general income to sustain the website</p><p>Wtpeyton</p></div>	<div><p>Customer Security: There must be a legal agreement between the company and the customers to ensure that customers are not being taken advantage of as well as the comapny being safe against customers intending to take advantage of the website.</p><p>Wtpeyton</p></div>	<div><p>Internal Communication: Coding communication and production line will likely use github or microsoft azure, while staff members will likely communicate through microsoft teams, slack, or discord.</p><p>Wtpeyton</p></div>	<div><p>Management: There would need to be a management team that ensure the staff members are remaining productive, professional, and positive within the workplace.</p><p>Wtpeyton</p></div>
